

Lesson 1 Reflections Sheet (to be done in a pair)

ID Codes.....

Write your set of instructions here

Write your Scratch code here (if you run out of space ask for another sheet of paper)

Write down here any changes you had to make to your Scratch programme to get it working

Write here your final Scratch code (ask for another sheet of paper if you run out of space!)

After we have talked about it as a class, what are your final thoughts about the similarities/differences between giving instructions to a computer compared to a human?

After we have talked about it as a class, write down your thoughts on how Python is similar/different to Scratch and also how you feel about learning Python. How do you feel about learning Python? Are you excited/nervous etc.?
