

Programming Lesson 1

Miss Wallace

“Giving instructions to computers”

What do **you** think we are going to be doing?

What do **you** think we are going to be doing?

Scratch -> Python

Lesson Aims

I can recognise that programming is giving instructions to a computer.

I can devise a Scratch program that draws simple shape(s).

I can visualise, without the use of a computer, the execution of a Scratch program.

What do **you** think we are going to be doing?

Scratch -> Python

Starter

What will be said after running this code?

- A. All done
- B. Inside the if
- C. Inside the if
All done
- D. Inside the else
All done
- E. Inside the if
Inside the else
All done

Starter

- Have a think throughout this lesson about how we give instructions. How is giving instructions to a computer different/similar to giving instructions to other people?
- I'll ask for your thoughts at the end!

Activity 1 – Drawing

- You are going to work in pairs for this task

Activity 1 - Drawing

- You are going to work in pairs for this task
- Quickly look at the shape I have given you but make sure your partner doesn't see it!

Activity 1 - Drawing

- You are going to work in pairs for this task
- Quickly look at the shape I have given you but make sure your partner doesn't see it!
- Your partner will be blindfolded and you have to give them instructions to draw your shape

Activity 1 - Drawing

- You are going to work in pairs for this task
- Quickly look at the shape I have given you but make sure your partner doesn't see it!
- Your partner will be blindfolded and you have to give them instructions to draw your shape
- In your jotters, write down a set of instructions for your partner to draw your shape

Activity 1 - Drawing

- You are going to work in pairs for this task
- Quickly look at the shape I have given you but make sure your partner doesn't see it!
- Your partner will be blindfolded and you have to give them instructions to draw your shape
- In your jotters, write down a set of instructions for your partner to draw your shape
- You have 5 minutes to write your instructions

Activity 1 - Drawing

- You are going to work in pairs for this task
- Quickly look at the shape I have given you but make sure your partner doesn't see it!
- Your partner will be blindfolded and you have to give them instructions to draw your shape
- In your jotters, write down a set of instructions for your partner to draw your shape
- You have 5 minutes to write your instructions
- Now, take turns at giving instructions to your partner!

Activity 1 – Reflection

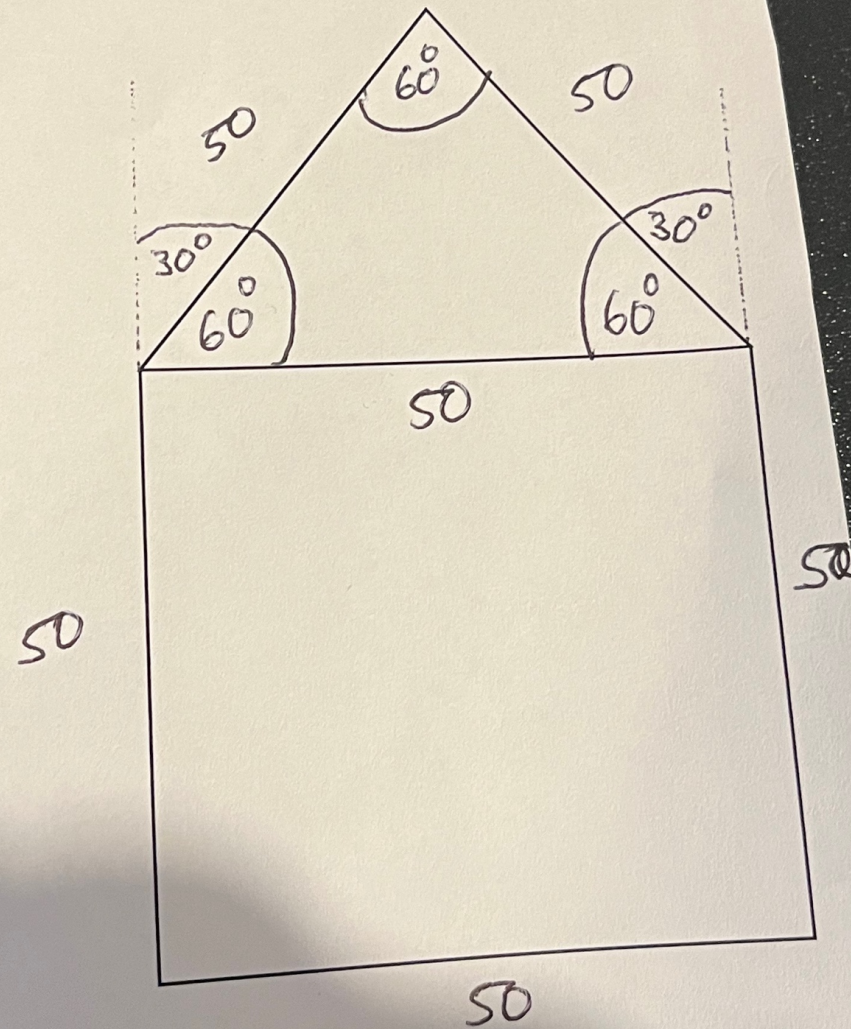

- How did that go? What did we find difficult? What instructions did people find helpful?

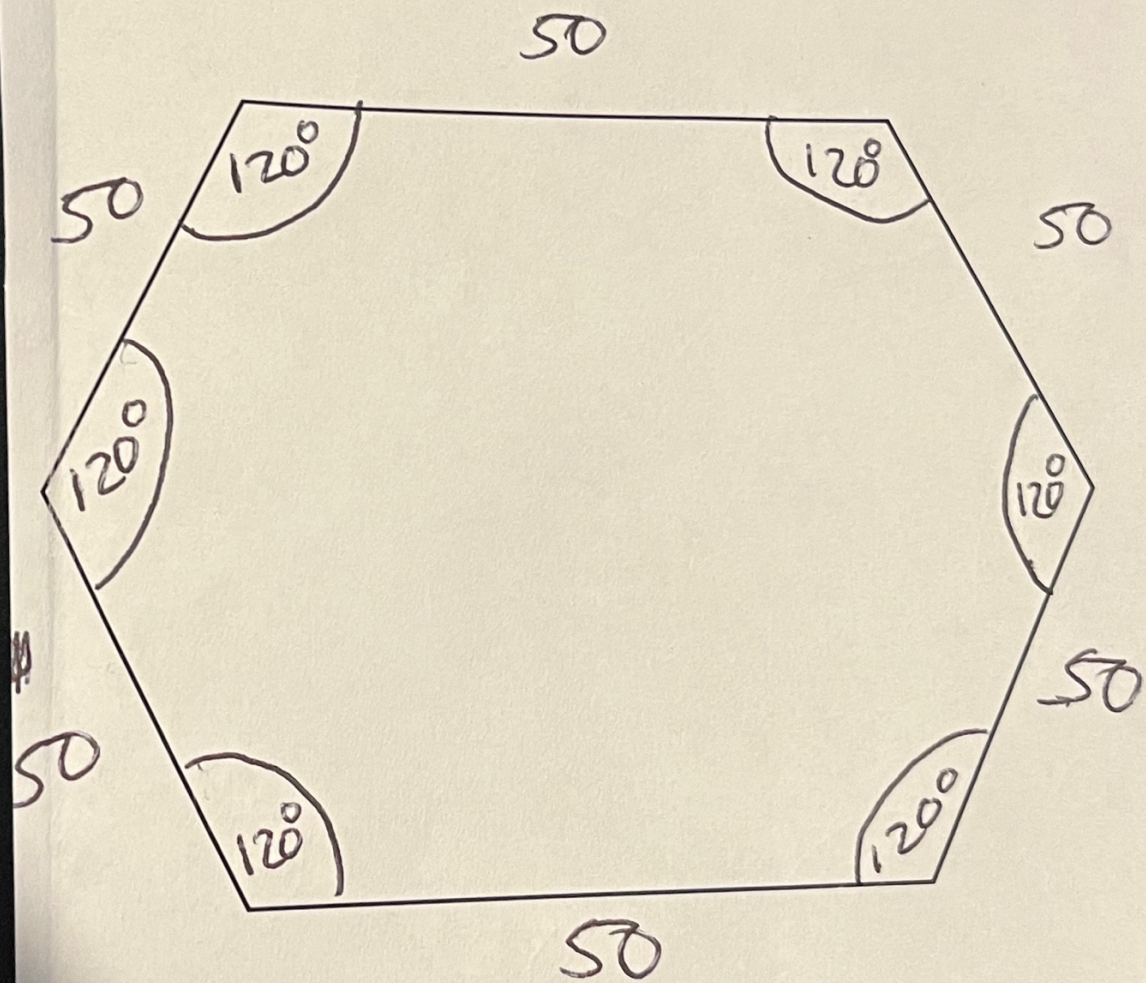

Activity 2 - Scratch pen

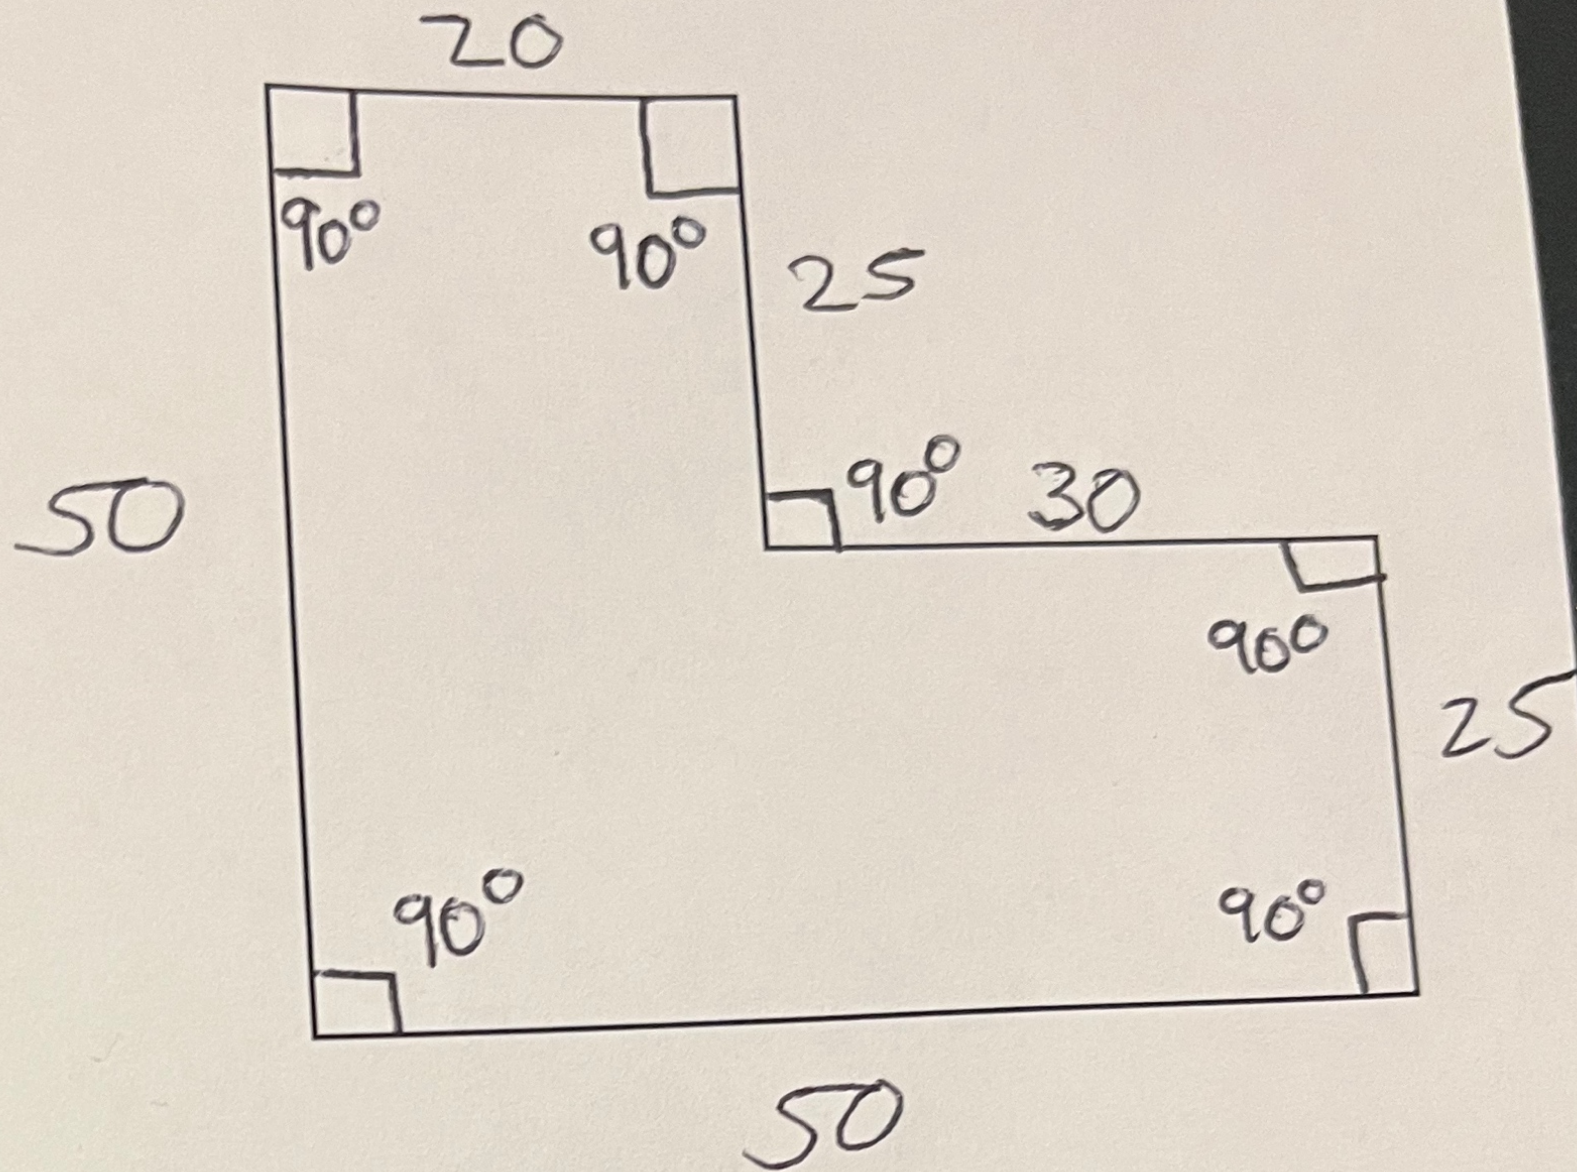

- Go to Scratch! We are going to explore the pen tool.

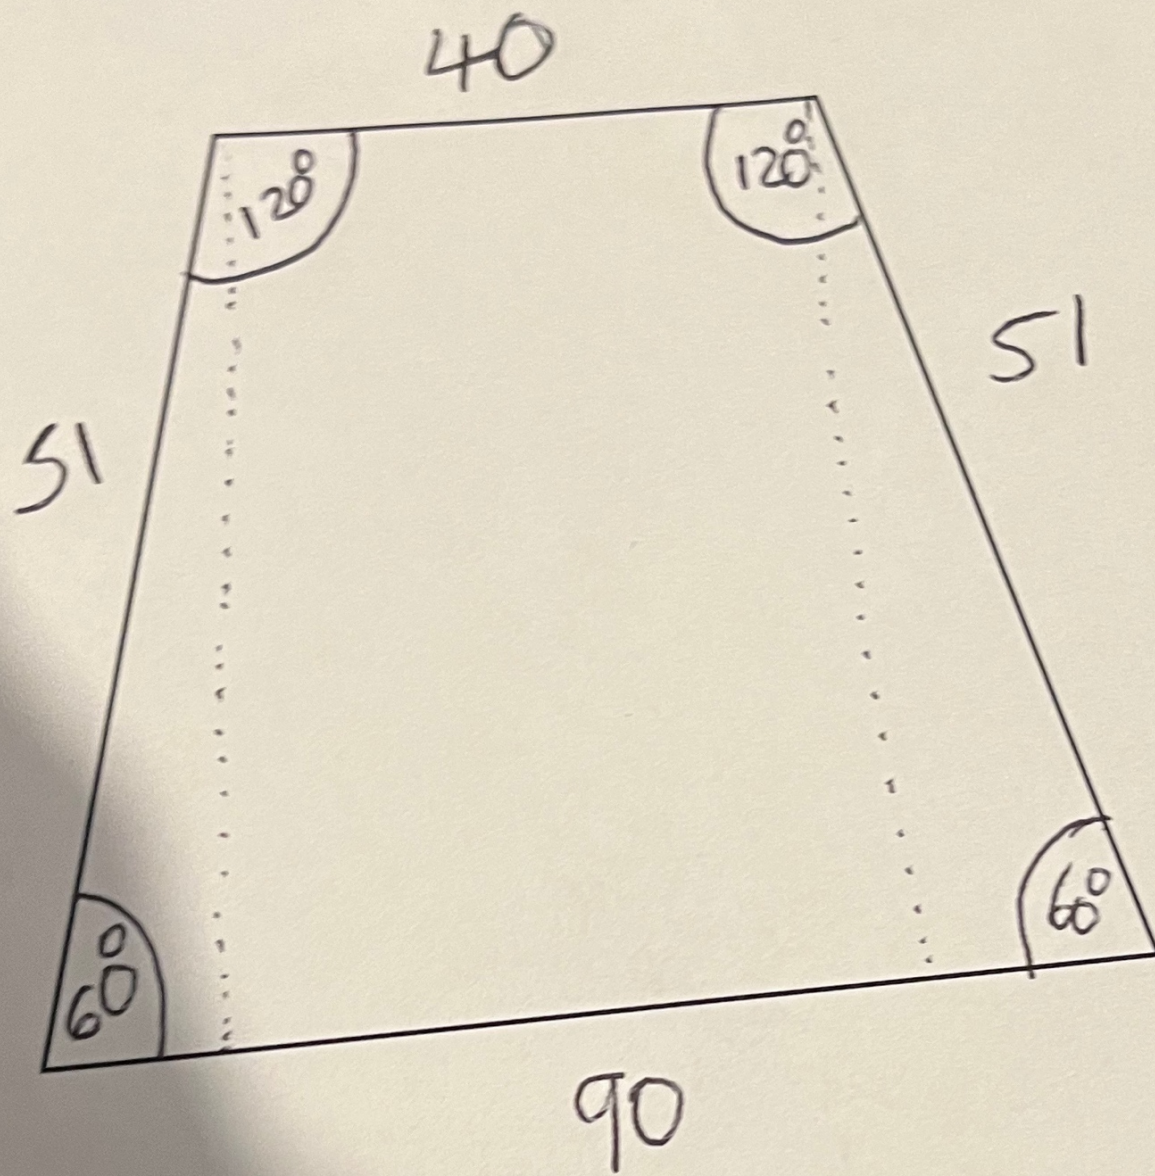

Activity 2 - Scratch pen

- Go to Scratch! We are going to explore the pen tool.
- Pick one of the shapes that you and your partner have.
- You are going to work in your pairs to use Scratch pen to draw this shape.
- First, write this code **on paper!**
- Write this in your jotters first and when you and your partner are happy with this, write it on your sheets.
- You have 20 minutes to come up with your code!

Activity 2 - Scratch pen

- Now, we are going to test our code in Scratch!
- Did your code work as you expected?
- You have 15 minutes to make any edits you need to get your Scratch code working!

Activity 2 – Scratch pen

- Let's do a bit of reflection on how that went!

Activity 3 – Python Quiz

- Try the Python quiz I have given out! Don't worry if you find it difficult – these are all things we are going to be learning over the next few weeks!

Exit Pass

- Thank you all for taking part in today's lesson :)
- The final thing I will ask you to do is to fill out your "exit passes" - we are going to be doing one of these every lesson. In future, they will include a quiz question about what we have been doing that lesson, but this one is just asking you for a bit of feedback.
- See you all next week for more Python!!
