

Lesson 5

“Drawing with computers”

Starter

- To think about: compare the use of turtle in this lesson to what we saw in lesson 1 with Scratch pen. Which do you prefer and why?

Activity 1 – Spot the variable (15 minutes)

- You have 3 sheets of paper on your tables. Work in your tables to mark where you think variables might be used in these.

Activity 2 – Introduction to Python turtle

- Let's have a look at how turtle works!

Activity 2 – Introduction to Python turtle (15 minutes)

- Draw your own shape(s) using turtle
- You have 5 minutes to plan and write code **on paper** to draw both a circle (any size you want!) and another shape of your choice.

Activity 2 – Introduction to Python turtle (15 minutes)

- Draw your own shape(s) using turtle
- You have 5 minutes to plan and write code **on paper** to draw both a **circle** (any size you want!) and **another shape of your choice**.
- You have 10 minutes to input your code. Did it work as expected? If not, write down what needs to be changed to get it working.
- Use your cheatsheets to help you
- **Challenge:** describe what `turtle.color()` and `turtle.begin_fill()/turtle.end_fill()` do!

Activity 3 – Circles

- What size did you all pick for your circles?

Activity 3 – Circles

- What size did you all pick for your circles?
- Do we think we could write a program that lets you make a circle of any size?

Activity 3 – Circles

- What size did you all pick for your circles?
- Do we think we could write a program that lets you make a circle of any size?
- Let's try!

Activity 4 – Circles factory

- In pairs, write a program that lets someone type in what size circle they want and then draws a circle of that size.
- Extension: if you get finished with this, see if you can add to it so you can also choose the colour of the circle.
- Extra extension: try and create a similar program but with a different shape of your choice!

Activity 5 – more variable spotting

- Discuss in your tables and write on your reflection sheets what variables you can spot here.

End discussion

- What are your thoughts on Python Turtle compared to Scratch?

Closing

- Thank you all for taking part 😊
- Please fill out your exit passes with as much detail as possible for me. You've all been fantastic at giving feedback and it's very helpful for me!
